

MOBY White hulled

Short, stiff feed oat for Scandinavia

Advantages:

- Registered in Finland, Sweden and Norway
- Yield improvement plus 6 % compared to Belinda in Norway and Finland
- Short plant height, very good standing power and tolerance to straw break
- Low susceptibility to helminthosporium and leaf spots

Cultivation:

Highest yielding oat variety all over Scandinavia the last years
In Finland, better yield potential in Northern regions
The grain quality characters of MOBY are typical for feed oats

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long
