

# SU ARVID

Multitalent in usage for Grain, Feeding and Biogas

## Advantages:

- very high and stable yield due to a longer grain filling phase
- 2018 drought: European winner in yield
- short growing type with good lodging tolerance and still high dry matter
- one of the best double use variety in SU Portfolio (whole crop and grain)
- Above average in leaf health

## Cultivation:

Highest flexibility for your use of rye and no limitation for certain soil types. SU Arvid shows mid-high enzyme activity which is needed in years with very high falling numbers. In difficult years SU Arvid should be harvested early to ensure stable falling numbers.

## Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long

### Plant Development

Maturity

### Vitality

Lodging resistance

### Health

Ergot

### Quality
