

SU ARVID

Multitalent in usage for Grain, Feeding and Biogas

Advantages:

- very high and stable yield due o a longer grain filling phase
- 2018 drought: European winner in yield
- short growing type with good lodging tolerance and still high dry matter
- one of the best double use variety in SU Portfolio(whole crop and grain)
- Above average in leaf health

Cultivation:

Highest flexibility for your use of rye and no limitation for certain soil types. SU Arvid shows mid-high enzym activity which is needed in years with very high falling numbers. In difficult years SU Arvid should be harvested early to ensure stable falling numbers.

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long
