

SU FIETE^B

High yield and very healthy

Advantages:

- High yielding vigorous compensation type with medium heading and medium-late ripening date
- Good overall resistances, especially high mildew, septoria, yellow rust, brown rust and eye spot resistance (pch1-resistance)
- Medium-high falling numbers, high specific weight
- Good N-effectivity, high protein stability

Cultivation:

Suitable for early sowing dates

Little need of fungicides

CTU tolerant

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long

Plant Development

Vitality

Winter hardiness	5 (medium)
Drought resistance	6 (medium-high)
Lodging resistance	██████████
